Marta Pelegrín

Sevilla, 1973

My work consist of architecture design, spatial and material productions, as result of an attitude understood as the following:

THREAD:

concepts, text and ideas on architecture as a conceptual framework that support our architectural practice. It have been developed in critical articles, research discussions, lectures and exhibition curatorial works.

TISSUE:

a social, educational and institutional network able to combine, thicken and share those experiences and cultural situations that are occurring. This fabric or knitting, works with the context, as not only the place for design, but also the spaces that continue regenerating themselves.

CONFECTION:

a series of architectural productions, which express, 'spatialize' and materialize the processual conceptual work that refers to 'thread' and 'tissue' respectively. Works of architecture that integrate an attitude that is reflected in my work.

EDUCATION

Deutsche Schule Albert Dürer, Sevilla .
2000 Arquitect Superior at Escuela Técnica Superior de Arquitectura (E.T.S.A.) in Seville.

Nº1. Awarded 'best graduation qualification record ' of the year's generation)1st from 348 students)
